

2010 RAPTOR RESEARCH FOUNDATION CONFERENCE

Fort Collins, Colorado, Sept. 22-26, 2010

National Wildlife Research Center (NWRC)

Wednesday, September 22, 2010

1:00 pm – 3:00 pm

Field Trip

The National Wildlife Research Center (NWRC) is a major facility within the U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service's (APHIS) Wildlife Services (WS) program. The National Wildlife Research Center is the federal institution devoted to resolving problems caused by the interaction of wild animals and society. The Center applies scientific expertise to the development of practical methods to resolve these problems and to maintain the quality of the environments shared with wildlife.

NWRC is headquartered on the Foothills Research Campus of Colorado State University (CSU) in Fort Collins, CO. Approximately two-thirds of NWRC's 150-person staff is located in Fort Collins; the remainder of the highly specialized staff are located throughout the United States, and address regional wildlife damage management issues. Further, NWRC routinely conducts international consultancies in this specialized area.

The Center evaluates damage situations and develops methods and tools to reduce or eliminate damage and resolve land-use conflicts. NWRC scientists study birds, mammalian predators, rodents, and other wildlife that cause serious but localized damage problems. The Center designs studies to ensure that the methods developed to alleviate animal damage are biologically sound, effective, safe, economical, and

acceptable to the public. NWRC scientists produce the appropriate methods, technology, and materials for reducing animal damage. Through the publication of results and the exchange of technical information, the Center provides valuable data and expertise to the public and the scientific community, as well as to APHIS's Wildlife Services (WS) program.

Transportation is not included.

Address: 4101 LaPorte Avenue, Ft. Collins ([Google Map](#))

Cost: Free

Trip Limited to 25 People

This guided tour of the NWRC will require pre-registration. Security will require the names and birthdates of individuals at least two days prior to the tour. Send name and birthdate to contact at least two days prior to the tour. Tour participants will need to provide a photo ID on day of tour. No photography or videography is allowed on the tours.
